Watertight Utility Board

General Purpose, Construction Site and Metering

Product Description

Qehribar Watertight Utility Boards are outdoor low-voltage utility and metering enclosures developed for general-purpose service distribution, construction-site supply, and single-phase / three-phase metering applications. The range combines ABS / PC / metal construction, IP65 ingress protection, up to IK10 impact resistance, UV-resistant outdoor suitability, and an operating temperature range of -25°C to +60°C. With both wall-mounted and stand-alone installation suitability and multiple enclosure sizes, the series is intended for outdoor service locations where environmental protection and mechanical durability are essential.

Application / Use

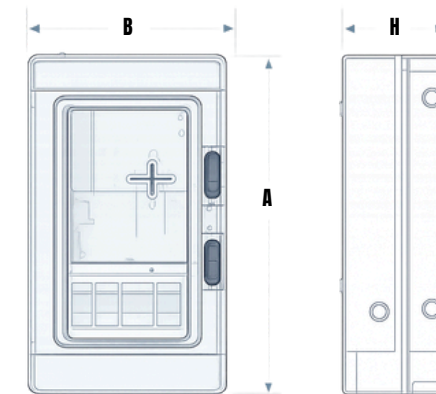

Designed for outdoor utility, temporary power, and metering installations, including construction-site service points, single-phase and three-phase metering locations, and general-purpose field distribution boards requiring a watertight enclosure.

Features

- Outdoor utility-board configuration
- IP65 protection
- Up to IK10 impact resistance
- ABS / PC / metal construction
- Wall-mounted or stand-alone installation
- Single-phase and three-phase metering suitability
- UV-resistant construction
- Operating temperature: -25°C to +60°C

Available Range
